

## Creating Recordings Using a Touchscreen or Tablet

### Required Hardware

To record lessons from your tablet, you'll need a reliable internet connection, [webcam](#), and microphone. Most tablets will have built-in cameras and microphones. Reliability and ease-of-use are often more important than quality, so keep your setup as simple as possible.

### Required Software

The easiest way to record smartphone or tablet content for Illinois is to use Kaltura's mobile app, [KMS Go](#), which will allow you to record, edit, and share your video with your students. KMS Go is compatible with Android and iOS devices, and is [supported by Technology Services](#).

1. Download the KMS Go app through your device's app store
2. When the app first opens, you'll be prompted to select a domain. Enter:  
<https://mediaspace.illinois.edu>
3. Click the profile icon in the top-right corner to login with your NetID and authenticate
4. In the bottom-left corner, choose "upload," then "video," then "camcorder" to begin a camera recording OR choose a screen recording from your device
  - [There are a wide variety of screen recorders available for mobile devices](#), which may or may not be compatible with your device. Please look online to find the best recorder your device.
  - If you typically use a whiteboard or chalkboard in your teaching, consider using a small whiteboard that will fit in the frame of your webcam. At home you can present to your computer's webcam using this whiteboard during recorded teaching sessions.
5. You'll have an opportunity to review your video; name it and choose "upload"
6. Choose "yes" when prompted to confirm your video upload

### Editing and Publishing

You can [make basic edits to your video](#) if necessary and [create captions](#) directly in Mediaspace. After recording, you can [send the links to students directly, or embed the videos into an LMS like Compass or Moodle](#).

### Additional Assistance

Additional online tutorials and dates for training workshops can be found on Illinois' [Instructional Continuity website](#). For further support in this area, contact [keepteachingsupport3@illinois.edu](mailto:keepteachingsupport3@illinois.edu).
